

## CS 111 Recitation 5

### Exercise 1:

Write a program which outputs the biggest number in a sequence of numbers. Ask the user for how many numbers they will enter and then ask for each number. Output the biggest number entered by the user. \*you must use a for-loop.

### Exercise 2a:

Write a program that draws a horizontal pyramid of a height specified by a user.

Ex: height = 5:

```
*
**
***
****
*****
****
***
**
*
```

### Exercise 2b:

Write a program that draws the same pyramid as in the previous exercise but vertically.

Ex: height = 5:

```
  *
 ***
*****
*****
*****
*****
```
